Materials Engineer
2005-2011
Simón Bolívar University
Caracas-Venezuela

Advanced English C1
2013-2014
Centre of English Studies
Dublin-Ireland

IDIOMAS

Spanish => Native
English => Fluent
German => Basic

EXPERIENCE

FullStack Developer / Allware Chile – august 2023 – till now.

At the heart of Entel's dynamic environment, I develop new web projects, transitioning from **.NET**'s MVC architecture to **ReactJS** and **Node**. Engaging **Styled Components** and the versatile **Tanstack** Table and Query library, I craft more functional UI components. Empowering our forms with **React Hook Forms** and **Yup** for seamless validation. In the backend, **ExpressJS** alongside **SQL Server** and leveraging the efficiency of **Stored Procedures**. Embracing innovation, we integrate **PRISMA ORM** into our new ventures. Azure hosts our deployments while **PowerAutomate** our email workflows. We fallow agile **SCRUM** methodology ensuring adaptability and excellence at every turn.

Rumen Web Page (Freelance) -- December 2023 – on development.

Developed dynamic and user-friendly. Using **React JS**, **TailwindCSS**, **NestJS**, and **MongoDB** to create a highly functional landing page with integrated e-commerce platform. Enabled customers to conveniently place delivery or take-away orders through the intuitive online ordering system. Demo project here: https://rumen-reydavid1500.vercel.app/

Entrepreneur -- November 2021 – March 2023

Opened a Restaurant and Food Processing Company dedicated to preparing BBQ Texas smoked meats.

Sales Engineer -- Industry related – 2012 – 2019

Experienced Sales Engineer in diverse industries, including welding, gas applications, and industrial materials.
