PROFESSIONAL PROFILE

Full-Stack Software Engineer with 2+ years of production experience specializing in React, TypeScript, and NestJS. Built and maintained business-critical frontend systems for a major Latin American telco and event-driven backend microservices for a fintech lending platform. Strong focus on clean UI implementation, component architecture, application state management, and end-to-end feature ownership. Actively seeking a mid-level engineering role in Switzerland.

TECHNICAL SKILLS

Frontend: React, TypeScript, Next.js, TanStack Query / Table, Zustand, React Hook Form, Tailwind CSS, Styled Components

Backend: Node.js, Express.js, NestJS, REST APIs, Jest, Event-Driven Architecture, Message Queues, Prisma ORM

Databases: SQL Server, MongoDB, PostgreSQL.

Tools & Practices: Git, GitHub, Vite, CI/CD, Jira, Agile/SCRUM.

PROFESSIONAL EXPERIENCE

Software Engineer – Risk & Underwriting | **Galgo** | Fully remote. Sep 2025 – May 2026

FINTech · CONSUMER LENDING VC-backed Chilean fintech (fmr. Migrante) — digital vehicle financing & credit for underbanked populations across Chile, Peru, Colombia & Mexico. \$153M raised; IFC / World Bank partner.

Tech: NestJS, TypeScript, MongoDB, Message Queues, Event-Driven Architecture, Jest, Monorepo, Git/GitHub

- Developed and maintained NestJS microservices for a business-critical risk platform processing loan approval and fraud detection decisions across Latin America — used daily by underwriting teams in 4 countries.
- Maintained 90%+ automated test coverage (Jest unit + integration tests) across financial services, ensuring production reliability in a zero-tolerance-for-errors environment.
- Integrated multiple third-party fraud and risk APIs, expanding fraud signal coverage without service downtime.
- Operated Cursor as a primary development tool in a team that treated AI-assisted coding as standard practice — designing, reviewing, adapting, and overriding generated output daily.
- Modelled complex fraud detection rules using Taktile (Python-based decision flows), translating risk stakeholder requirements into automated, auditable decision logic.

Full-Stack Developer – Client: Entel Telecom | **Allware** | Santiago, Chile Aug 2024 – Sep 2025

TELECOMMUNICATIONS Allware is a Chilean software consultancy. Primary client: Entel — Chile's largest telco (11,500+ employees, ~\$3B revenue), serving 9.5M mobile subscribers across Chile & Peru.

Tech: React, TypeScript, Zustand, Styled Components, React Hook Form, Yup, TanStack Query/Table, Express.js, SQL Server, Prisma ORM

- Led frontend architecture and implementation for the migration of Entel's core admin system from legacy .NET MVC to React + TypeScript — delivered across 12+ application modules within 3 months with a team of 6+ engineers.
- Built a high-throughput internal e-commerce platform handling 300+ transactions in 15 minutes with zero errors under production load.
- Owned client-side state management (Zustand, TanStack Query) and contributed backend logic via Express.js and Prisma ORM — operating across the full stack.
- Developed complex form validation systems (React Hook Form + Yup) and responsive UI components from Figma designs to production.

Freelance Full-Stack Developer – Client: FROMM Chile | **Self-Employed** | Remote April 2024 – Feb 2025

INDUSTRIAL MANUFACTURING · B2B FROMM Chile is the local subsidiary of the FROMM Group — a Swiss family-owned industrial packaging manufacturer (est. 1947, €350M+ turnover, 40+ global subsidiaries).

Tech: React, TypeScript, Tailwind CSS, NestJS

- Sole developer: designed, built, and deployed fromm-pack.cl — a full-stack web application replacing a legacy WordPress site, resulting in a significant increase in inbound leads.
- Built customer-facing quote request portal and internal admin dashboard for product and sales workflow management, end-to-end.

Entrepreneur, Rumen Smoked Meats. | **Self-Employed** | Pucon, Chile *Nov 2021 – March 2024*
Food Processing & Restaurant Business

- Founded and operated a food processing and restaurant business; managed operations, supplier relationships, budgeting, and customer experience.

Sales Engineer Venezuela / Chile *Sep 2012 – Jul 2019*

Industrial Sector *B2B technical sales of industrial materials — refractories, welding consumables, lubricants, and machinery — to enterprise clients in oil & gas, mining, construction, and manufacturing.*

- Managed multi-year accounts with procurement and engineering teams at industrial enterprises across Venezuela and Chile.
- Delivered technical workshops and product demonstrations to engineers and operations managers; specified custom solutions for high-temperature, high-pressure, and corrosive environments.
- Operated in complex, long sales-cycle B2B environments — consistently meeting targets.

EDUCATION

Materials Engineer (equiv. MSc-level) *2005 – 2011*

Simón Bolívar University, Caracas, Venezuela

Advanced English Certificate (C1) *2013 – 2014*

Centre of English Studies – Dublin, Ireland

LANGUAGES

Spanish: Native **English:** Fluent (C1) **German:** Basic (A2) – ongoing coursework in Switzerland

HOBBIES & INTERESTS

Gluten-free sourdough baking · **Hiking in the Swiss Alps** · **Venezuelan & Latin American cooking**
