🇨🇭 B Permit (Family Reunification) — no sponsorship required

PROFESSIONAL PROFILE

Software Engineer with 3 years of production experience. React and TypeScript frontends application and event-driven NestJS microservices handling fraud detection and loan approval logic at scale in a fintech platform. Recently relocated to Switzerland with a valid B permit and actively seeking an opportunity to contribute to a local engineering team. Comfortable in English-speaking international teams. Entrepreneurial background adds business context that most engineers don't have. Actively improving German (A2, ongoing).

TECHNICAL SKILLS

Frontend: React, TypeScript, TanStack Query / Table, Zustand, React Hook Form, Tailwind CSS, Styled Components

Backend: NestJS, Express.js, Microservices, Event-Driven Architecture, Message Queues, Prisma ORM, AWS & Azure (basics)

Databases: MongoDB, SQL Server

Tools & Practices: Git, GitHub, CI/CD, Agile (SCRUM), Jest, Monorepo, Figma-based implementation

PROFESSIONAL EXPERIENCE

Software Engineer – Risk & Underwriting | **Galgo** | Fully Remote (Eschlikon, Switzerland) Sep 2025 – May 2026

FINTECH · CONSUMER LENDING VC-backed Chilean fintech (fmr. Migrante) — digital vehicle financing & credit for underbanked populations across Chile, Peru, Colombia & Mexico. \$153M raised; IFC / World Bank partner.

Tech: NestJS, TypeScript, MongoDB, Message Queues, Event-Driven Architecture, Jest, Monorepo, Git/GitHub

- Designed and maintained NestJS microservices for a risk platform processing loan approval and fraud detection decisions across Latin America.
- Achieved and sustained 90%+ automated test coverage (Jest) across critical financial services, reducing regression risk in high-stakes production.
- Integrated multiple third-party fraud and risk APIs, expanding fraud signal coverage without service downtime.
- Accelerated feature delivery using AI-assisted development workflows (Cursor) within an established agentic development culture, contributing to reduced boilerplate across a large monorepo codebase.

Full-Stack Developer – Client: Entel Telecom | **Allware** | Santiago, Chile Aug 2024 – Sep 2025

TELECOMMUNICATIONS Allware is a Chilean software consultancy. Primary client: Entel — Chile's largest telco (11,500+ employees, ~\$3B revenue), serving 9.5M mobile subscribers across Chile & Peru.

Tech: React, TypeScript, Zustand, Styled Components, React Hook Form, Yup, TanStack Query/Table, Express.js, SQL Server, Prisma ORM

- Participated in the migration of Entel's main admin system from .NET MVC to React + Express, reducing average page load time and improving maintainability for a team of 6+ engineers across 12+ application modules..
- Delivered an internal e-commerce platform that sold 300+ staff computers in 15 minutes with zero errors under high concurrent load.
- Owned frontend state management (Zustand, TanStack Query) and backend endpoints (Express.js, Prisma ORM) across multiple application modules.

Freelance Full-Stack Developer – Client: FROMM Chile | **Freelance / Part-time** | Remote Sep 2024 – Feb 2025

INDUSTRIAL MANUFACTURING · B2B FROMM Chile is the local subsidiary of the FROMM Group — a Swiss family-owned industrial packaging manufacturer (est. 1947, €350M+ turnover, 40+ global subsidiaries).

Tech: React, TypeScript, Tailwind CSS, NestJS

- Increased client sales by ~30% by replacing a legacy WordPress site with a modern full-stack web application (fromm-pack.cl) — sole developer, end-to-end.
- Built customer-facing quote request portal and internal admin dashboard to manage products and sales workflows.

Career Transition to Software Engineering 2019 – 2024

Career Transition to Software Engineering (2019–2024): Following 7 years in technical B2B industrial sales across mining, construction, and manufacturing, made a deliberate move into software engineering. This background — understanding customer needs, translating business requirements into solutions, and communicating across technical and non-technical teams — is directly relevant to product-oriented engineering roles."

EDUCATION

Materials Engineer (equiv. MSc-level) 2005 – 2011

Simón Bolívar University, Caracas, Venezuela — Strong foundation in systems thinking, numerical analysis, and engineering problem-solving.

Advanced English Certificate (C1) 2013 – 2014

Centre of English Studies – Dublin, Ireland

LANGUAGES

Spanish: Native **English:** Fluent (C1) **German:** Basic (A2) – actively studying, ongoing courses in Switzerland
