 Portfolio: <https://portfolio-evo.pages.dev/>

Software Engineer with strong Frontend and Full-Stack experience, specializing in React and TypeScript and building scalable, production-grade web applications. Proven backend experience with NestJS microservices in risk underwriting and fraud detection domains. Relocating to Switzerland on 27 March 2026, B permit application via family reunification upon arrival.

TechStack

Front-End

React · TypeScript · TanStack Query / Table · Zustand · React Hook Form · Tailwind CSS · Styled Components · Responsive Design.

Back-End

NestJS · Express.js · Microservices · Event-Driven Architecture · Message Queues · Prisma ORM · AWS and Azure basics.

Databases / Tools & Practices

MongoDB · SQL Server · Git · GitHub · CI/CD · Agile (SCRUM) · Figma-based implementation.

Experience

Software Engineer, Risk & Underwriting Team

Galgo

SEP 2025 – Present

Santiago, Chile

Technologies: NestJS, TypeScript, MongoDB, Message Queues, Event-Driven Architecture, Jest, Taktile (Python-based flows), Git/Git-Hub

- Backend-focused Software Engineer within the Risk & Underwriting team, responsible for designing and maintaining critical services supporting fraud detection and loan approval.
- Develop and maintain NestJS microservices in an event-driven architecture using message queues.
- Implement fraud detection, risk assessment, and loan approval logic.
- Integrate third-party fraud and risk management services.
- Apply business rules using Taktile (Python-based low-code flows).
- Write automated tests using Jest, aiming for 90%+ code coverage.
- Improve development productivity by leveraging AI agents and Cursor rules for boilerplate generation and code implementation.
- Collaborate closely with product, data, and risk stakeholders to translate business requirements into reliable backend services.

Full-Stack Developer, (Client Project – Entel)

Allware Chile

AUG 2024 – SEP 2025

Santiago, Chile

Technologies: React, TypeScript, Zustand, Styled Components, React Hook Form, Yup, TanStack Query/Table, Express.js, SQL Server, Prisma ORM

- Built multiple responsive web applications based on Figma designs.
- Developed robust form validation systems using React Hook Form and Yup.
- Managed global and server state using Zustand and TanStack Query.
- Designed and maintained backend endpoints with Express.js and Prisma ORM.
- Worked in an Agile (SCRUM) environment with daily stand-ups and sprint planning.

Freelance Full-Stack Developer

Self-Employed

SEP 2024 – FEB 2025

Santiago, Chile

Technologies: React, TypeScript, Tailwind CSS, NestJS

Project: <https://fromm-pack.cl/>

- Designed and developed a customer-facing portal and admin dashboard from scratch.
- Delivered an end-to-end solution used by real customers, supporting quotation requests and administrative workflows.
- Implemented responsive UI using Tailwind CSS.
- Built a scalable backend architecture with NestJS.
- Built an internal admin dashboard to track quotations, products, and sales processes.

Entrepreneur, Rumen Carnes Ahumadas

Food Processing & Restaurant Business

NOV 2021 – MAR 2023

Santiago, Chile

- Founded and operated a restaurant and food processing company focused on Texas-style smoked BBQ meats.
- Managed operations, suppliers, budgeting, and customer experience.

Sales Engineer

Industrial Sector

2012 – 2019
