B Permit (Family reunification – no sponsorship required)

Software Engineer with strong Frontend and Full-Stack experience, specializing in React and TypeScript, building scalable, production-grade web applications. Proven experience in backend systems (NestJS, microservices) within fintech domains, including risk underwriting and fraud detection. Strong focus on clean architecture, performance, and delivering reliable solutions aligned with business needs.

Technical Skills

Front-End

React · TypeScript · TanStack Query / Table · Zustand · React Hook Form · Tailwind CSS · Styled Components · Responsive Design.

Back-End

NestJS · Express.js · Microservices · Event-Driven Architecture · Message Queues · Prisma ORM · AWS and Azure basics.

Databases / Tools & Practices

MongoDB · SQL Server · Git · GitHub · CI/CD · Agile (SCRUM) · Figma-based implementation.

Experience

Software Engineer, Risk & Underwriting Team

Galgo

SEP 2025 – Present

Fully remote

Technologies: NestJS, TypeScript, MongoDB, Message Queues, Event-Driven Architecture, Jest, Taktile (Python-based flows), Git/Git-Hub

- Backend-focused Software Engineer within the Risk & Underwriting team, responsible for designing and maintaining critical services supporting fraud detection and loan approval.
- Develop and maintain NestJS microservices in an event-driven architecture using message queues.
- Implement fraud detection, risk assessment, and loan approval logic.
- Integrate third-party fraud and risk management services.
- Write automated tests using Jest, aiming for 90%+ code coverage.
- Improve development productivity by leveraging AI agents and Cursor rules for boilerplate generation and code implementation.

Full-Stack Developer, (Client Project – Entel Telecom)

Allware Chile

AUG 2024 – SEP 2025

Santiago, Chile

Technologies: React, TypeScript, Zustand, Styled Components, React Hook Form, Yup, TanStack Query/Table, Express.js, SQL Server, Prisma ORM

- Contributed to the migration of Entel's main admin system from .NET MVC to React + Express, significantly improving performance and maintainability.
- Developed an internal e-commerce platform that successfully sold 300+ old staff computers in 15 minutes with zero errors under high load.
- Managed global and server state using Zustand and TanStack Query.
- Designed and maintained backend endpoints with Express.js and Prisma ORM.
- Worked in an Agile (SCRUM) environment with daily stand-ups and sprint planning.

Freelance Full-Stack Developer

Self-Employed

SEP 2024 – FEB 2025

Santiago, Chile

Technologies: React, TypeScript, Tailwind CSS, NestJS

Project: <https://fromm-pack.cl/>

- Increased client sales by ~30% by replacing a legacy WordPress site with a faster, modern web application.
- Delivered an end-to-end solution used by real customers, supporting quotation requests and administrative workflows.
- Implemented responsive UI using Tailwind CSS and continuous SEO optimization.
- Built a scalable backend architecture with NestJS.
- Built an internal admin dashboard to track quotations, products, and sales processes.

Entrepreneur, Rumen Smoked Meats.

Food Processing & Restaurant Business

NOV 2021 – MAR 2023

Santiago, Chile
